

Ignacy Łukasiewicz's Secondary Technical School No. 4 in Krosno is implementing a project financed from European Funds entitled:

*„The awareness of differences and similarities in professional competence both in Poland and abroad as a chance for the success in professional career.”*

*The main goal of the project is to identify the differences and similarities in professional competence both in Poland and abroad in order to improve the quality of vocational education.*

*Comparing Polish job market to other European job markets students will verify their strengths and weaknesses as well as set new targets in the implementation of their future careers.*

*The project will give the chance to exchange European experience, to transfer the knowledge and to promote innovative working methods as well as modern organizational solutions.*

*Having gained the experience during the traineeship abroad participants of the project will be more competent in their language skills in English, especially with regard to ESP used in their future career.*

*The project financed by EU: 93 114 EUR*
